Advanced Report Writer

Advanced Report Writer is a reporting tool created for Earnie, enabling you to create, customise and export your own reports.

All reports created with the Advanced Report Writer (ARW) can be previewed, printed, exported, emailed and published in the same way as a standard library report. This includes uploading to IRIS OpenSpace and publishing to IRIS OpenPayslips.

You are able to add any fields held in the Earnie database to your reports, and add data to a report that is not necessarily held in Earnie, for example, a Total column/row of certain data on your report.

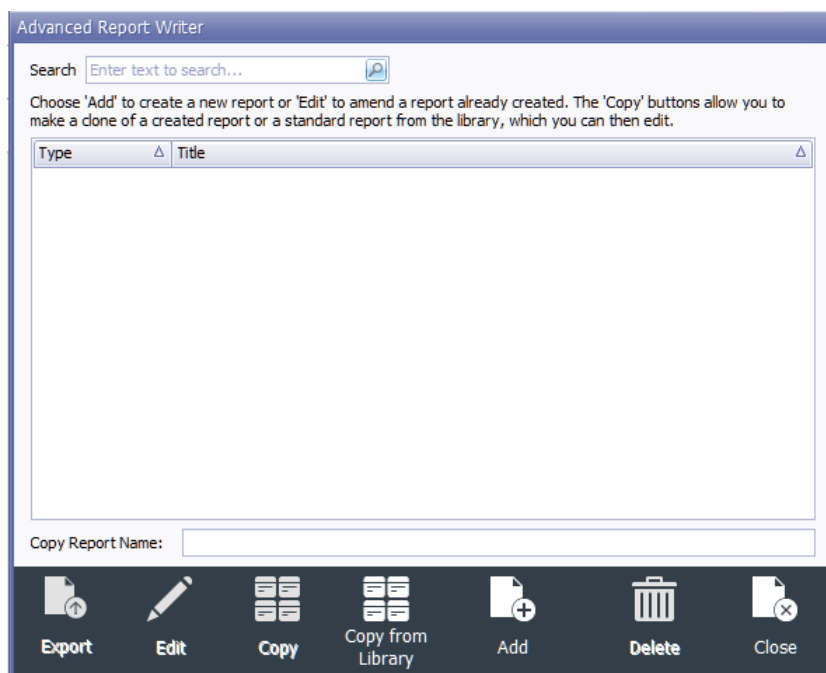

This guide will describe how to:

- How to access **Advanced Report Writer**
